## Student Learning Outcomes

### Outcome 1
The program enables students to achieve, by the time of graduation, an ability to analyze a problem, and to identify and define the computing requirements appropriate to its solution.

- **Assessment Methods**
  - Class assignments evaluated with rubric
  - Final exam

### Outcome 2
The program enables students to achieve, by the time of graduation, an ability to design, implement, and evaluate a computer-based solution to meet a given set of computing requirements in the context of the discipline.

- **Assessment Methods**
  - Final project evaluated with rubric
  - Final exam

### Outcome 3
The program will enable students to attain, by the time of graduation, an ability to communicate effectively with a range of audiences about technical information.

- **Assessment Methods**
  - Team project and presentation evaluated with rubric
  - Writing assignment evaluated with rubric
